WORK EXPERIENCE

SOFTWARE ENGINEER

Shohoz

2024 to Present

- Refactored and optimized large-scale legacy Laravel applications, improving maintainability and performance.
- Implemented multi-domain authentication module for secure, scalable access management.
- Developed real-time bus seat booking module, handling high concurrency and data consistency.
- Implemented an advanced logging system to accelerate real-time issue detection and debugging.

JUNIOR SOFTWARE ENGINEER

Appnap

2022 to 2024

- Developed scalable RESTful APIs for e-commerce platforms using Laravel.
- Optimized database queries with Eloquent ORM, improving application performance.
- Implemented Bkash payment gateway, enabling secure digital transactions.
- Wrote unit tests for critical APIs, reducing post-deployment issues.
- Created and maintained API documentation, ensuring clear communication across teams.

PROJECTS

- **Jantrik Dokan** : Full e-commerce solution (Laravel backend APIs, Next.js frontend, Inertia.js admin panel).
- **Robodoc** : Laravel + Next.js e-commerce site with REST APIs, documentation, and unit tests.

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience in full-stack development using Laravel, React, and Next.js. Skilled in designing scalable APIs, optimizing databases, and deploying with Docker. Passionate about clean, maintainable code, continuous improvement, and delivering robust, production-ready solutions in agile environments.

CORE SKILLS

- **Languages & Frameworks:** PHP (Laravel), JavaScript (Next.js, Node.js), Python, Go (basic)
- **Databases:** MySQL, PostgreSQL
- **DevOps & Cloud:** Docker, CI/CD (GitHub Actions, GitLab CI)
- **Web Technologies:** HTML, CSS, Tailwind, Bootstrap
- **Tools:** Git, Postman, Docker

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

Institution: American International University
Bangladesh

Year of Graduation: 2021

CGPA: 3.69
